Feed summary

Software Development

- This studio covers **Software Development** sector and has been made by Baker Tilly. The goal of this study is to provide a general overview of the market.
- All the data about companies, acquisitions and founding rounds was extracted **in May 2025**. Deals, rounds and companies founded after this date have not been included.

Scope and definition

General Overview

Software development refers to the process of:

- DESIGNING
- CODING
- TESTING
- DEPLOYING

applications and systems that support digital operations across industries. It is a foundational pillar of digital transformation, enabling organizations to automate workflows, enhance user experiences, and unlock new revenue models.

TOP COMPANIES

Gigster

Founded in 2013

Phoenix Technologies

Founded in 1979

Unicorn

Founded in 1990

Main subsegments:

Custom Software Development: This subsegment focuses on building tailored solutions that meet specific operational, regulatory, or strategic needs.

Low-Code/No-Code Platforms: These platforms allow technical and non-technical users to create applications using drag-and-drop interfaces and prebuilt logic.

Generative AI in software development refers to artificial intelligence systems—especially large language models and deep learning algorithms—that can automatically create code, documentation, tests, or even software designs in response to natural language prompts or requirements.

Size and growth

Present and future of Software Development

- Mordor Intelligence projects a compound annual **growth rate (CAGR) of 10.12%**, with a market value of **532.33 billion USD in 2025** and a forecast of **862.01 billion USD by 2030**.
- Business Research Insight estimates a **CAGR of 14.51%**, with a market value of **435.99 billion USD in 2024** and a forecast of **1,475.9 billion USD by 2032**.
- Global Growth Insights reports a **CAGR of 11.74%**, with a market value of **258.57 billion USD in 2024** and a forecast of **702.19 billion USD by 2033**.

Global Growth Insights

MARKET FORECAST			
Reports	CAGR	Market Value	Forecast
Mordor Intelligence	10.12%	532.33 billion USD (2025)	862.01 billion USD (2030)
Business Research Insight	14.51%	435.99 billion USD (2024)	1475.9 billion USD (2032)
Global Growth Insight	11.74%	258.57 billion USD (2024)	702.19 billion USD (2033)

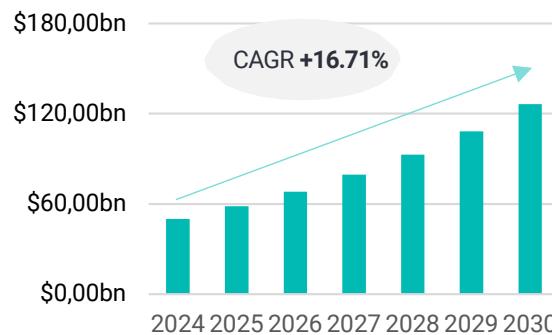

Size and growth

Present and future of Software Development

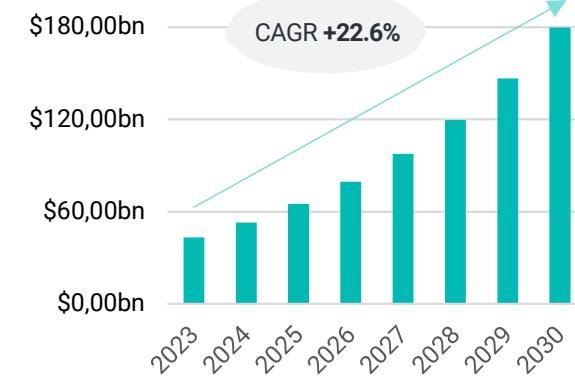

The main sub-segments are experiencing considerable growth due to the accelerated digital transformation in all sectors.

- Companies need to automate business processes and demand for technology solutions tailored to the specific needs of each company.
- Businesses are looking for software that integrates seamlessly with their systems, is scalable and allows them to respond quickly to market or regulatory changes.
- The adoption of technologies such as artificial intelligence, machine learning, cloud computing and advanced data analytics is driving the creation of more efficient and personalized tools.

Generative AI in Software Development Market Forecast

Custom Software Development Market Forecast

Geography

Regional Analysis

SOFTWARE DEVELOPMENT REGIONAL MARKET FORECAST

Europe

The European software market is expanding, led by digital transformation, cloud adoption, and strong demand for secure, high-quality solutions.

North America

This remains the world's largest software development market, led by the United States. Major tech companies and early adoption of AI, cloud, and automation drive growth. Software and IT services spending dominates, with double-digit annual growth rates.

Middle East and Africa

Growth here is accelerating, driven by digital transformation in banking, government, and telecommunications, as well as investments in tech infrastructure and cybersecurity.

Asia

This is the fastest-growing region, thanks to rapid digital transformation, a thriving startup ecosystem, outsourcing, and investments in cloud and AI. Countries like India, China, and Japan are leading the expansion and driving demand for tech talent.

Latin America

While it represents a smaller share of the global market, Latin America shows steady growth due to business modernization, digitalization, and adoption of cloud and mobile solutions. Brazil and Mexico are the main regional drivers.

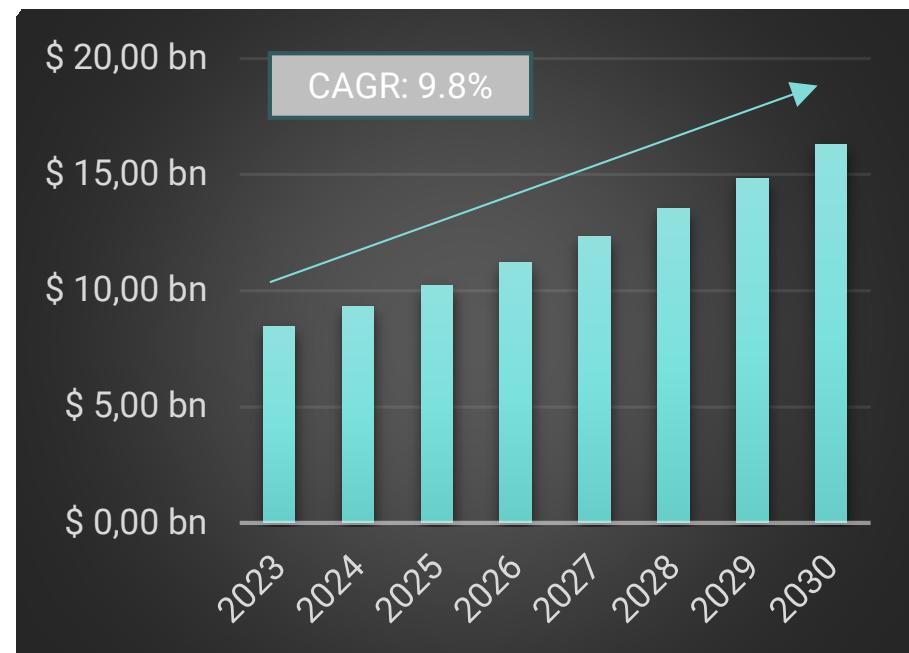

Geography

Software Development in Spain

The Spain Software Development Market size is forecasted to reach **USD 16.31 billion by 2030, after growing at a CAGR of 9.8% during 2023-2030.**

According to Digital Economy and Society Index 2021, Spain ranks third in the EU in connectivity and seventh in digital public services, with levels well above the European average.

- Spanish start-ups secured **€1.9 bn in VC investment, according to data from Dealroom.** That is nearly **four times more than the first half of 2020 when €500 million was raised.**
- There are more than **26,909 apps from Spanish publishers out of the 2,937,948 apps on Google Play.**
- As the region receives a wave of venture funding and interest from tech companies, there is growing momentum to address the region's tech community's labor shortage by empowering workers to operate in Spanish.

Geography

Software Development in Spain

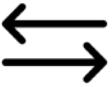

Government Initiatives

-  Spain is therefore the country that would receive most funds from the Recovery, Transformation and Resilience Plan (Next Generation EU).
-  Spain will receive up to €140 billion from the Recovery, Transformation, and Resilience Plan (Next Generation EU) between 2021 and 2026.
-  23.1% of the funds will be allocated to the digitalization of industry, SMEs, and tourism.
-  The goal is to increase e-commerce for SMEs to 25%, with current levels under 10%.
-  The Digital Toolkit Program will invest €3 billion between 2021 and 2023 to support basic digitalizarion for SMEs.

Key drivers

Key Growth Drivers of the Software Development Market

MAIN GROWTH DRIVERS OF SOFTWARE DEVELOPMENT MARKET

			
Digital Transformation across all sectors <ul style="list-style-type: none">Organizations are overhauling legacy systems to remain competitive.Software development is at the core of this transformation, especially in industries like BFSI, healthcare, manufacturing, logistics, and government.The shift includes automation, process digitalization, and customer experience redesign-leading to sustained demand for tailored and scalable solutions.	Demand for Customization in Enterprise Software <ul style="list-style-type: none">Off-the-shelf solutions are increasingly inadequate for sector-specific needs (e.g. logistics, fintech, healthcare).Organizations demand tailored solutions that can integrate with their systems, meet compliance standards, and evolve over time-fueling sustained demand for custom development capabilities.	Global Talent Scalability and Cost Optimization <ul style="list-style-type: none">The global software workforce is increasingly distributed.High-quality developers in India, Eastern Europe, LATAM, and Southeast Asia have enabled round-the-clock development and margin optimization for firms in developed markets.	Expansion of low-code / no-code platforms <ul style="list-style-type: none">Enables much faster and more cost-effective application development, accelerating innovation and time-to-market.Democratizes software creation, allowing non-technical professionals to build digital solutions and reducing reliance on expert developers.By 2025, 70% of new applications will use low-code/no-code platforms, with ROI exceeding 188% in large enterprises.The global market for these platforms is growing rapidly and is expected to account for over 65% of application development activity by 2024-2025.

Key trends

Key Trends Shaping the Future of Software Development

AI-Augmented Development Becomes Mainstream	Rise of Platform Engineering and Internal Developer Platforms	Sustainability in development	Low-Code / No-Code Platforms	Development Security Operations
---	---	-------------------------------	------------------------------	---------------------------------

Generative AI tools like GitHub Copilot, CodeWhisperer, and Tabnine are accelerating code creation, debugging, documentation, and testing. **Up to 30% of new code is now AI-generated in early adopter companies.**

- Boosts developer productivity and speeds time-to-market.
- Shifts developer roles from pure coding to supervision and integration.

Rise of Platform Engineering and Internal Developer Platforms

Engineering teams are building internal platforms to standardize developer tooling, improve onboarding, and increase autonomy across squads.

Sustainability in development

Companies prioritise responsible practices, such as the energy efficiency of code and the use of sustainable infrastructure, to reduce the environmental impact of software.

Low-Code / No-Code Platforms

These tools democratise development, allowing non-technical people to create applications and accelerating digitalisation in companies of all sizes.

Security is being baked into every stage of development. Static code analysis, SCA, secrets detection, and shift-left practices are now required.

Vibe coding is a programming paradigm in which developers describe problems in natural language, and AI systems generate the corresponding code. This approach shifts the programmer's role from manual coding to guiding, testing, and refining AI-generated solutions.

Go-to Market Strategies

Market

Go-to Market Strategies

MARKETING APPROACH	
APPROACH	DETAILS
CONTENT MARKETING	Blog posts, whitepapers, and SEO-driven landing pages targeting tech keywords.
THOUGHT LEADERSHIP	CTO-authored articles, webinars, engineering culture showcases.
TRADE SHOWS & EVENTS	Presence at events like Web Summit, Mobile World Congress, DevOpsDays.
ACCOUNT-BASED MARKETING	Personalized outreach to target enterprise decision-makers.
INDUSTRY CASE STUDIES	Focus on ROI, use-case detail, and measurable KPIs (e.g. reduced TTM by 40%).
DIGITAL ADVERTISING	Targeted Google Ads, LinkedIn Sponsored Posts, and programmatic campaigns.

Supplier categories

Key Supplier Categories

CLOUD INFRASTRUCTURE PROVIDERS	Offer scalable and reliable infrastructure services, enabling developers to deploy applications without managing physical servers.
DEVELOPMENT TOOL VENDORS	Provide tools that automate the integration and deployment of code, facilitating continuous delivery.
QA & TESTING PROVIDERS	Provide tools and services for automated and manual testing to ensure software quality.
SECURITY & COMPLIANCE VENDORS	Offer tools and services that identify security vulnerabilities and ensure compliance with industry standards.
PLATFORM-AS-A-SERVICE (PaaS)	Offer platforms that allow developers to build, run, and operate applications without managing infrastructure.
OUTSOURCED DEVELOPMENT FIRMS	These providers handle content distribution, localization, and subtitling, ensuring that media reaches global audiences effectively.

Cloud Hyperscalers	Vertical-SaaS Roll-up Funds	Global Tier-1 SI	Financial-Services Groups	Horizontal SaaS
Enterprise-Apps Suite	Platform Carve-out Funds	Regional / Near-shore SI	Industrial & Auto	Vertical SaaS
Dev/Infra Software Vendors		Digital Engineering Pure-plays	Retail / E-commerce	Dev Tools / DevOps
Vertical SaaS Specialists			Telecom Operators	Cyber-security Software
<ul style="list-style-type: none"> Cloud Hyperscalers (e.g. AWS, MSFT, GCP) buy DevTools / DevOps and Data / Analytics SaaS 6x more often than any other vertical. Enterprise-App Suites (SAP, Salesforce) overwhelmingly target Horizontal SaaS (36 of 43 deals) to expand product clouds. Financial-Service Corporates favour FinTech / InsurTech (31 of 52 deals) but are now second-most active in AI/ML. 				Data / Analytics SaaS
				AI/ML Specialists
				IT-Services / Dev Shops
				Digital Design / CX Agencies
				Mobile / Web Studios
				Other Niche Tech (IoT, blockchain, OT-security)

M&A Strategy

Strategic Software / SaaS Corporates

STRATEGIC CORPORATES	TARGET PROFILE	DESCRIPTION
Cloud Hyperscalers	DevTools / DevOps / Data / AI	<ul style="list-style-type: none"> Synergies: Integrations into their platform ecosystems (e.g. AWS DevOps suite, GCP AI tools). Growth Potential: Drive cloud consumption by selling tooling natively on their marketplaces. Financial Returns: Small tuck-in prices with huge platform monetization upside via usage-based billing. Market Consolidation: Hyperscalers often acquire small tech firms to remove friction in developer adoption.
Enterprise App Suites	Horizontal SaaS	<ul style="list-style-type: none"> Synergies: Expands their module suite (e.g. adding CPQ, HR, billing to ERP/CRM clouds). Growth Potential: Cross-sell to installed enterprise customers with 90%+ renewal rates. Financial Returns: High-margin SaaS recurring revenue boosts valuation multiples. Market Consolidation: Reduce vendor sprawl for customers.
Dev / Infra Vendors	DevTools / Cybersecurity / Data	<ul style="list-style-type: none"> Synergies: Complements existing monitoring, observability, security offerings. Growth Potential: Bundle into developer platform pricing. Financial Returns: Low integration cost with high net retention impact. Market Consolidation: Own more of the DevOps toolchain.
Vertical SaaS Providers	Vertical SaaS / FinTech / HealthTech	<ul style="list-style-type: none"> Synergies: Expand into adjacent workflows (e.g. payroll + tax + compliance). Growth Potential: Monetize deeply embedded customer relationships. Financial Returns: Vertical specialization defends pricing power. Market Consolidation: Build category leadership via roll-ups.

VERTICAL TYPES

FinTech / InsureTech
HealthTech
PropTech
RetailTech / Commerce

M&A Strategy

Traditional / Non-Tech Corporates

BUYER SUBTYPE	TARGET VERTICAL	WHY IT'S ATTRACTIVE	COMMON SYNERGIES
Financial-Service Corp	FinTech, RegTech, Data-driven Finance	<ul style="list-style-type: none"> Acquiring compliance-ready SaaS or AI risk tools accelerates product rollout without deep internal build. Improves time-to-market and enables digital wallet or open banking integrations. 	AML/Fraud engines + KYC + payments rail; open banking + user base expansion
Industrial / Auto Corp	IoT, Digital Twin, Edge Intelligence	<ul style="list-style-type: none"> Embedding software IP allows legacy industrials to transition to Industry 4.0 Frequent cost-savings through automation & predictive maintenance. 	IoT sensors + analytics + ERP integrations
Retail / E-Commerce Corp	UX, Loyalty SaaS, Last-Mile Logistics	<ul style="list-style-type: none"> Improves conversion, personalization, and fulfillment UX. Low capital intensity + short time-to-value. 	CRM + loyalty tech + e-commerce CMS
Telecom Corp	OSS/BSS Tools, Network Management, 5G DevOps	<ul style="list-style-type: none"> Needed to modernize their legacy stacks (billing, provisioning) Critical for 5G monetization and virtualization. 	OSS + network analytics + policy control modules

M&A Strategy

IT-Services / Consulting Integrators

Global Tier-1 System Integrators

TARGET VERTICAL		
DevOps / DevTools SaaS	AI/ML Specialists	IT Services / Dev Shops
Tools that automate CI/CD pipelines, infrastructure as Code (IaC), container orchestration, and developer productivity.	Firms with applied AI expertise-model training, data pipelines, predictive analytics.	Mid-size agile development teams providing custom web, mobile, or backend software solutions.
Tier-1 SIs need to modernize their tech stack and embed DevOps practices in enterprise digital transformation. Owning tooling provides differentiation.	Clients demand AI capabilities in every enterprise workflow (HR, ops, finance). SIs must integrate AI in core services.	Plug-and-play scale for delivery. Helps win large deals where manpower is key.
<ul style="list-style-type: none"> • Integrate tools into delivery playbooks • Upsell managed services around DevOps • Improve project velocity & reduce delivery errors 	<ul style="list-style-type: none"> • Package AI accelerators into transformation programs • Improve analytics offerings • Win strategic projects via pre-built IP 	<ul style="list-style-type: none"> • Nearshore/offshore capacity • Better staff utilization • Talent supply for long-term outsourcing contracts

M&A Strategy

IT-Services / Consulting Integrators

Regional / Near-shore System Integrators

TARGET VERTICAL	
Mobile / Web Studios	Dev Shops / Agile Teams
<p>Boutique development agencies specializing in mobile apps, PWAs, or front-end architecture.</p> <p>Entry point to product engineering capability; ability to go upmarket in CX transformation.</p> <ul style="list-style-type: none">• Immediate capability expansion• Cost-effective, regional teams• Faster go-to-market for client PoCs	<p>Teams of 50-200 engineers with niche skills or sector focus (e.g., FinTech, logistics).</p> <p>Organic scale is slow; M&A is faster and low-risk, when buying proven delivery centers.</p> <ul style="list-style-type: none">• Time-zone advantage• Expand coverage in fast-growing industries• Shared delivery methodologies

M&A Strategy

IT-Services / Consulting Integrators

Digital Engineering

TARGET VERTICAL

Digital Design / CX Studios

UX/UI design agencies, product strategy firms, service design consultancies.

Differentiation through design is critical in high-value digital transformation projects.

AI / ML Specialists

Teams focused on practical applications of AI-personalization, demand forecasting, LLM customization.

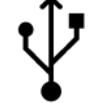

Allows creation of proprietary assets and reusable machine learning components.

- Merge-design + engineering for full-stack offer
- Improve pre-sales (better prototypes, visioning)
- Build vertical accelerators with refined user journeys

- Apply AI across vertical templates
- Recruit top-tier AI talent in niche domains
- Enhance brand as a modern transformation partner

M&A Strategy

Buyer Type vs Target Size

				
FINANCIAL SPONSORS / PE PLATFORMS	STRATEGIC SOFTWARE / SaaS CORPORATES	TRADITIONAL / NON-TECH CORPORATES	IT SERVICES / CONSULTING INTEGRATORS	
TARGET SIZE	<ul style="list-style-type: none"> Focused on \$10M - \$500M funded targets Avoids seed-stage / <\$1M deals 	<ul style="list-style-type: none"> Concentrated on <\$50M (esp. \$1M - \$10M) Partial appetite for \$50 - 100M+ Rare in \$100M+ 	<ul style="list-style-type: none"> Mostly <\$10M when data is available 	<ul style="list-style-type: none"> Targets <\$100M; preference for \$10 - \$100M Avoids high-growth or venture-backed plays
WHY	<ul style="list-style-type: none"> Seek predictable ARR and margin Buy-and-build potential across verticals Valuation arbitrage (entry 8-12x, exit 15x) 	<ul style="list-style-type: none"> Roadmap accelerators (IP-driven) Acqui-hire dev teams or internal platforms Bolt-on functionality for cloud suites 	<ul style="list-style-type: none"> Internal digital transformation Acqui-hire dev teams or internal platforms Often one-off deals led by digital business units 	<ul style="list-style-type: none"> Delivery team expansion Add proprietary IP to services Region/talent expansion via nearshore/offshore hubs

M&A Strategy

Buyer Type vs Target Size

In our database of more than 800 Software Development transactions

- 72% of targets bought by Cloud Hyperscalers have <\$10M total funding (tech acqui-hire / tuck-in).
- Non-Tech Retail buyers gravitate to <\$50M funding firms - "build vs. buy" cost logic.
- PE sponsors dominate the >\$50-100M band, consistent with platform roll-ups.

M&A Strategy
